

Prof. Dr. Shilun QIU
Department of Chemistry
Jilin University
Qiqinjin street 2699, Changchun 130012
P.R. CHINA

Dear Prof. Shilun QIU,

This is an invitation letter for you and for your wife Ms. Nanjie LIU to visit the University of Calabria – Department of Environmental and Chemical Engineering. Our university in the Italian panorama is a young university founded in 1968. The University of Calabria have about 35000 students and offers 32 degree courses and 46 master courses. In the university are active 10 PhD schools in different fields.

The Department of Environmental and Chemical Engineering with a permanent staff of 40 professors and researchers carried out research in the field of water and soil protection and remediation and in the main fields of Chemistry and Chemical Engineering such as: preparation and characterization of new materials (including nano-structured materials), preparation of membrane and application in industrial processes, heterogeneous catalysis, new processes for sequestration and reuse of CO₂ and new processes for the environmental protection.

The laboratory of Industrial Chemistry and Catalysis is very active in the preparation of new catalysts such as: zeolite, mesoporous materials, carbon nanotubes and in the application of these material in low-carbon print processes. Will be a pleasure and an honor if you visit our department in the next time, it will be an opportunity for an exchange of point of views on research conducted in our universities and will certainly be fruitful for future collaborations between Jilin University and University of Calabria. The best time for your visit is from 27th April to 13th May in 2017.

Sincerely yours
Prof. Girolamo Giordano

Head of the Department
of Environmental and Chemical Engineering

Rende, Italy: March 14, 2017
