Dear Prof. Wenjing Tian,

**9th International Conference on Materials for Advanced Technologies
Invitation to speak at Symposium "T) The Third International Symposium on Aggregation Induced Emission:
Materials, Mechanisms and Applications"**

On behalf of the organising committee, I cordially invite you to be an Invited Speaker at the **9th International Conference on Materials for Advanced Technologies (ICMAT 2017)**, scheduled to be held from **18 – 23 June 2017** in Singapore (<http://icmat2017.mrs.org.sg>).

The International Conference on Materials for Advanced Technologies, or more commonly known as ICMAT, is a major biennial event organized by The Materials Research Society of Singapore (MRS-S).

Started in 2001, ICMAT has become an established international conference in the field of materials research. It provides the major forum to discuss the latest developments and fosters collaboration between materials scientists. The fact that ICMAT 2017 will be the 9th in the series and attracted more than 20 Nobel Laureates speaks volumes about the success of the series in sustaining the interest among the materials research community worldwide.

ICMAT 2017 features 10 plenary lectures, 4 theme lectures and 30 technical symposia, each focusing on a specific research area in materials science, with the expected participation of 2,000+ delegates from about 50+ countries. You are invited to speak at Symposium "T) The Third International Symposium on Aggregation Induced Emission: Materials, Mechanisms and Applications". Each invited talk is 30 minutes (inclusive of Q&A).

As a non-profit organization, the organizer does not have the financial resources to fund your travel expenses or provide speaker's honorarium, but we hope you will be able to accept the invitation and look forward to welcoming you to Singapore, to feel the dynamism and share our ideas in advancing materials research in Asia.

Thank you.

Best Regards,

Prof. BVR Chowdari
Conference Chairman
